

RFID Smart Feeder Cart

Optimize offline job set-up and get real-time inventory, location and usage information from anywhere in the factory

OUTCOMES:

- - Track feeders and components offline
- - Real-time inventory
- - Eliminate human errors
- - Reduce waste of time and materials

Cogiscan's revolutionary RFID Smart Feeder Cart expands the concept of intelligent feeders from SMT placement machines and feeder banks to storage carts.

With RFID antenna mounted on the storage cart, and a Cogiscan RFID tag attached to each feeder, tags and antenna communicate to provide real-time location and usage information.

The RFID Smart Feeder Cart can be used in combination with Cogiscan software applications, or can be integrated with third-party software applications.

The RFID Smart Feeder Cart can be used with different brands and models of feeders and storage carts.
